

Outdoor Rug Trends 2025-2026

Current Market Trends Overview

Outdoor living spaces are increasingly being treated as "living rooms" in their own right. Outdoor rugs have evolved from simple functional pieces to powerful decor elements that ground spaces, add layers of coziness, and make outdoor areas feel more intentional and inviting.

Designer Insights

Laura Williams, owner and principal designer of Living Oak Interior Design:

"An area rug, indoor or outdoor, will ground your space and make it feel more intentional. When styling with an area rug in an outdoor area, you're adding a layer of coziness that with the natural vastness of the outdoors otherwise would not exist."

Allison Garrison, interior designer and principal of Allito Spaces:

"Adding rugs is one of many tools that can be used to create layers, and it is oftentimes overlooked outdoors."
